Unordered sub-list.

List not implemented

ListItem not implemented

Actual numbers don't matter, just that it's a number

ListItem not implemented

Ordered sub-list

ListItem not implemented

And another item.

You can have properly indented paragraphs within list items. Notice the blank line above, and the

leading spaces (at least one, but we'll use three here to also align the raw Markdown).

To have a line break without a paragraph, you will need to use two trailing spaces.Note that this line

is separate, but within the same paragraph.(This is contrary to the typical GFM line break behaviour,

where trailing spaces are not required.)
